

Unmanned Systems

A 'platform agnostic' supplier of support and services to manufacturers and end-users of unmanned systems

As a pioneer in the unmanned services industry and one of the world's largest support providers, VT Group is uniquely positioned to be a global value-adding partner. Our UAV operators are certified to fly numerous platforms such as ScanEagle® (more than 15,000 flight hours), Maveric, Raven®, Shadow®, Pioneer and Hunter.

VT Group owns, operates and provides as fee-for-service (wet leases) more than a dozen drones (UAVs) varying in size and configuration optimized to support vital military and commercial interests in the U.S. and overseas.

Why Choose VT Group?

Deploying, managing, maintaining, repairing, and training personnel on a single platform or a fleet of unmanned vehicles can be inefficient and costly. As an experienced partner we are experts at minimizing risk and maximizing operational productivity.

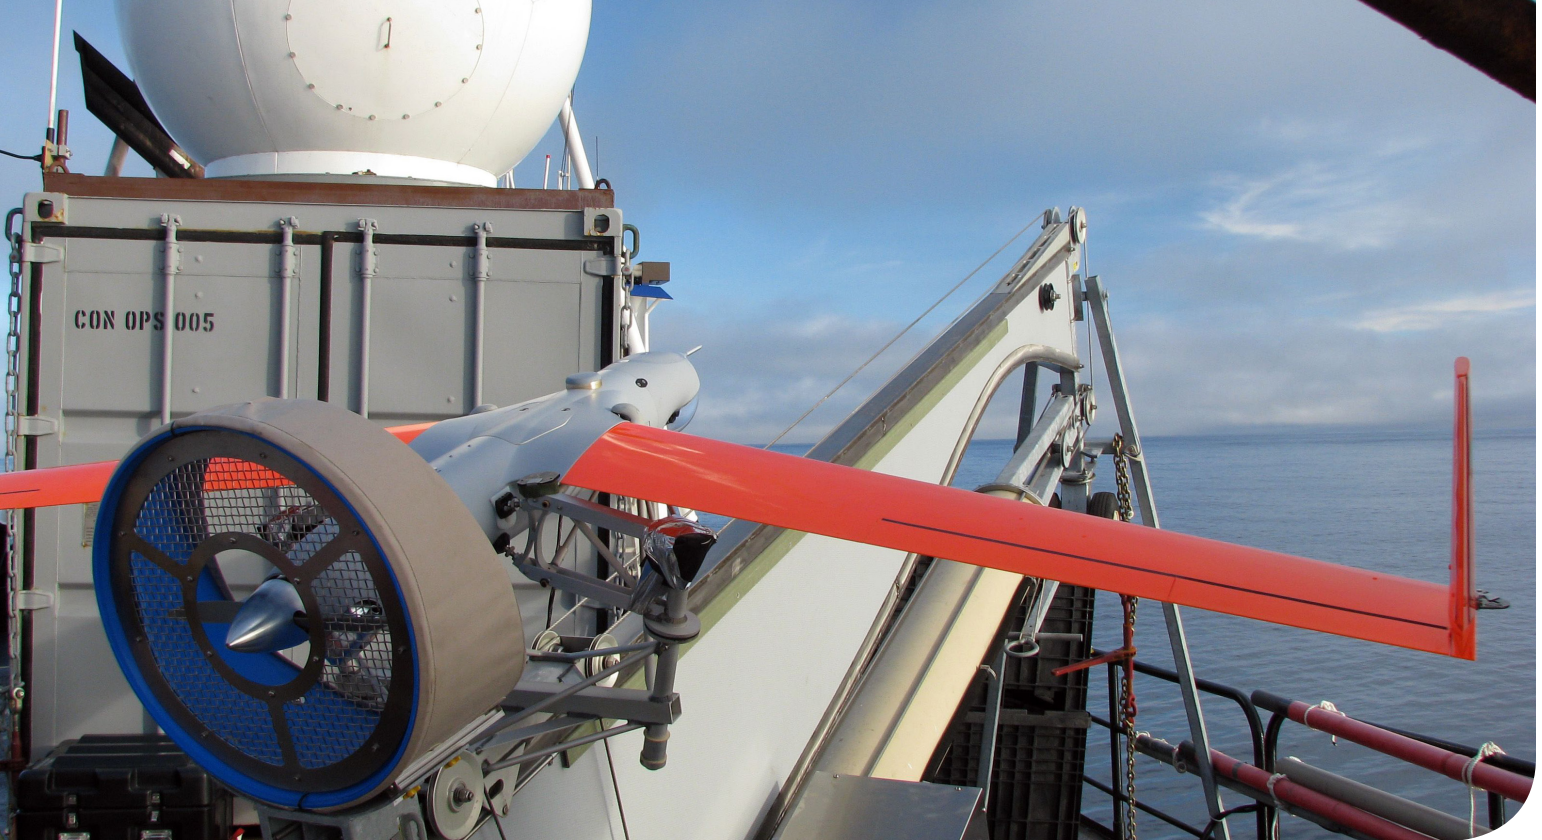

- We are small enough to be highly flexible and economical, large enough to offer security and stability.
- We do not manufacture platforms or payloads. Our only vested interest is your mission's success.
- We offer proven, highly customizable services, either end-to-end or 'a la carte.'

Services

VT Group is a full-spectrum provider of services to the industry, including:

- Developing CONOPS
- Project Management
- Training
- Logistics
- Pre-Mission Testing
- System Operations
- Mission Analysis
- Maintenance/Repair

“Manning” Unmanned Systems

Iraq and Afghanistan—VT Group is there:

- Fielding in-theater UAV operators and mission coordinators providing hands-on ISR support
- Facilitated seamless integration of new technologies enabling rapid product migration and upgrades
- Providing accountability and expense control to the U.S. government through contracted performance-based logistics

Devastating earthquake in Haiti—VT Group was there:

- Assisted in the emergency relief efforts at the request of NGOs and relief agencies
- Rapid response: was on-station before the U.S. Military
- Employed new UAV technology to provide real-time situation assessment of otherwise inaccessible rural areas

Wildfire in California threatening a city—VT Group is ready:

- Pioneered the integration of unmanned systems into firefighting
- Developed concepts of operations (CONOPS) to support CAL FIRE and the U.S. Forestry Service
- Introduced new technology and systems providing for the safety and effectiveness of firefighters

NOAA and Petroleum Industry—VT Group is engaged:

- First UAV services company to fly sea-based operations in the Arctic Circle
- Supporting critical research and environmental studies
- Initiating the use of high resolution cameras and mosaicing technology to facilitate high-density data collection

In the ever-evolving world of unmanned systems, keeping abreast of technology can be a challenge.

Our Customers:

- Platform OEMs
- Energy Production Companies
- Educational Institutions
- U.S. and Foreign Militaries
- State and Local Agencies

Our Markets:

- Military/Defense/Homeland Security
- Oil/Gas Exploration and Production
- Law Enforcement and Anti-Piracy
- Research and Education
